

Spring Medallion

Final Border

Your quilt top should now measure about 76 1/2".

Press well, being very careful to not stretch the bias edges.

Cut or construct 4 ea. 6 1/2" strips x 92 1/2" or your quilt size plus 12" plus 3".

Following Charlotte's Painless, Nearly Pinless Mitring technique given earlier (and again now) attach these final borders to the Spring Medallion quilt. Thanks again to Charlotte for this wonderful technique.

Watch the orientation of each border as well as the fabric motifs as you put this border on.

Because you chose all your fabrics based on this border fabric, it is going to bring the whole quilt together even though it has not appeared in the quilt til now.

Press your quilt top again and admire it.

Next week, we will discuss options for making the back and for quilting this quilt.

Congratulations!
