

# Origami Sack

You'll find lots of uses for this cute little gem.  
Make some up for Halloween and fill with candy.  
Make with Autumn fabrics and fill with nuts at Thanksgiving.  
And these Origami Sacks make wonderful  
Gift Card Holders at the Holidays!

*You will need two squares of fabric (I used 10" squares). And a same size square of fusible web.*

1. Fuse the webbing to the reverse of one square, remove the paper and fuse to the second square forming a sandwich. Press well, especially along the edges.

Fuse two squares together

2. Using pinking shears or a pinking blade in your rotary cutter, pink the edges of the squares. You'll reduce the size of your square to about 9 1/2".

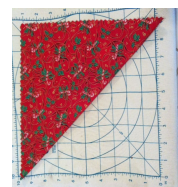

3. Next, fold the square along one diagonal and press well.

Trim with Pinked Edge

4. Fold one tip of the resulting triangle in as shown at right, keeping the pinked edge parallel to the folded edge. Fold the other tip in in the same way. Tack these points in place if desired... Or wait and tack them and a ribbon handle in place with a button when the sack is complete.

Press On One Diagonal

5. Finally, fold the top points down to their respective sides to complete the sack.

Press In Corners, Tack If Desired

6. As shown in Sack at lower right, you can tack the Step 4 points and a ribbon handle in place with a button when the sack is complete.

Press Points Down
