

LongArm Quilting Prep

Before sending your quilt to be quilted:

- Remove any stray threads
- Be sure quilt is square and flat as possible (It doesn't always quilt out!)
- Be prepared to discuss quilting design, thread color and cost up front
- Custom or edge to edge (Pantograph) design

Here are some suggestions for prepping your quilt for longarm quilting from local (Yorba Linda) quilter Cathy Farris (CathyFarrisQuilts.com):

To prepare your quilt for quilting:

1. Please press your quilt top and backing.
2. Backings must be 4" larger on each side of the top (8" wider and 8" longer overall).
3. Do not pin or baste the top and back together.
4. Batting is provided at above prices unless otherwise requested.
5. Pressing, piecing of backing, and binding services available at additional cost.
