

# Row Houses Christmas Tree Ornament

From LynBrown.com

The Fourth in Our 2014 Ornament of the Month Series

This ornament is just Fun and not too hard to make. The sample shown hasn't been stitched yet and it will be even yummy-ier when it is! But here's what you need...

5" X 7" Batting and Backing

Assorted Scraps

You'll also need 10" - 12" or ribbon for hanging.

## Assembly:

1. Trace the whole outer shape of the ornament onto the fusible twice. One will be your base, one will be the backing.. Also trace three gables (The triangles at the top of each house), three doors, six windows and two only house fronts (The red on either side in the sample). The middle house is the base fabric (Dark Green in the sample.)
2. The two house fronts go on either side of the base unit. Fuse them in place. Add the Gables. If a little of the base fabric shows tween the gable and the house front, consider it the Gutter or an Architectural Detail!
3. Fuse the windows and doors in place. Position the Row House atop the Batting piece and fuse in place. Trim. Position the backing and before fusing, tuck the hanging ribbon at the peak of each of the outer gables as shown. Fuse.
4. Stitch everything in place. Use a straight stitch or a little zigzag, catching the ribbon.
