

Mistletoe for June

From **LynBrown.com**

The Sixth in Our 2014 Ornament of the Month Series

Cutting:

5" X 8" of two different greens

2 " square of red

1" X 12" strip of red

5" X 8" and 2" square of Paper Backed Fusible Web

Assembly:

1. Adhere 5" X 8" fusing to the back of one of the greens per manufacturer's instructions. Fuse the second piece of green so the two greens are back to back with the fusing in between.
2. Note the pointed (Solid Line) vs. round (Dotted Line) end option on Template A. Choose your favorite.
3. Trace Chosen Template A eight times to the Fused Green Sheet so the line can be seen well. Cut just inside the lines to yield eight leaf shapes.
4. Trace Template B (Berry) to the 2" Fusible square six times. Fuse to back of red square. Cut out and set aside.
5. Arrange 4 of the leaf shapes into a "plus sign" overlapping about 1/2" in the center as shown at right. Stitch together in the center as shown by dotted lines. Make 2.
6. Fold the 12" strip of red in half lengthwise to make the hanging ribbon.
7. Sandwich the Step 4 units with the top unit turned a bit AND with the hanging ribbon ends caught at the center of the units as shown. Stitch again in the same way as before.
8. Cover stitching by fusing three red Berries over the center on both sides to complete your ornament. You could also add buttons!
